

Client: DMC Delta Mining Consolidated
 Services: Licence application for a river diversion
 Appointed Date: March 2011

Rietkuil Coal Project, South Africa

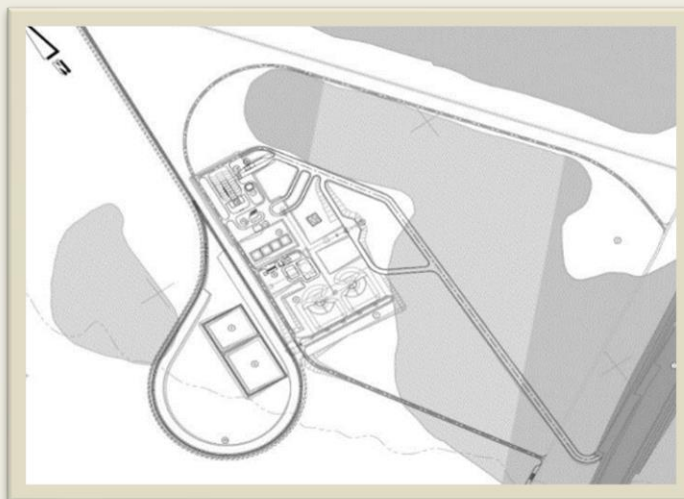

River diversion

Location

The Rietkuil Coal project is located within the Delmas magisterial district, Mpumalanga, 8km east of Delmas (75km from Pretoria).

The total surface area of the study is approximately 2 720 ha, on the property Rietkuil IR.

Rietkuil Coal project falls within the Olifants Water Management area, which is drained mainly by the Olifants river.

Water Management

- Determine the end-of-life land capability.
- Identification, investigation and implementation of suitable mitigation.
- Monitor infiltration into groundwater from surface pollution sources.
- Investigate and implement measures to limit excessive infiltration of contaminated water.
- Rehabilitate areas of spillage.
- Connectivity between the upstream and downstream wetland areas.
